### EXPERIENCE

Janice Lawson is the Senior Vice President of Environmental Management (EM) Operations for Savannah River Nuclear Solutions (SRNS). She is responsible for the safe execution of all environmental management operations at the Department of Energy's Savannah River Site (SRS).

Lawson has 37 years of nuclear operations experience, including in commercial nuclear power, with the majority being at SRS in roles of increasing responsibility. She served as dual facility manager for both the K Area Nuclear Material Project and the L Area Spent Nuclear Fuel Program. In this role, she led the plutonium downblend initiative and managed the receipt of nonproliferation materials. She has also served as the F/H Laboratory Manager supporting the process facilities. Her duties included special projects such as relocation of the Environmental Bioassay Laboratory and establishing analytical capabilities for various projects.

Prior to her current position, Lawson served at the Deputy Vice President of EM Operations for SRNS.

Lawson was recognized in 2018 by the South Carolina Chamber of Commerce as the Large Manufacturing Employee of the Year.
