## United Way Project Vision -- “Days of Caring.”

AIKEN, S.C. – (March 23, 2012) Savannah River Nuclear Solutions, LLC (SRNS) Engineer, Joe Ormand (center), leads a team of SRNS employees during just one of several charitable improvement projects that were part of this year's United Way Project Vision -- “Days of Caring.” The team, on their own time, spent the day building a new, front porch and stairs to replace one that was unsafe and rapidly deteriorating for a single mother who had recently lost her job. Over 230 SRNS employees, working on 14 separate projects throughout Aiken County, S.C., participated. Walls were painted and lawns mowed, while new rugs, hot water heaters, fencing and toilets were installed during this day-long, annual event. This is the sixteenth consecutive year Savannah River Site employees have come together to improve the quality of life during Days of Caring. “When the day is done, it brings tears to your eyes and joy to your heart when you see the homeowners smile,” said SRNS Project Vision Team Lead, Rhonda Whitley.

Savannah River Nuclear Solutions, LLC, is a Fluor Partnership comprised of Fluor, Newport News Nuclear and Honeywell, responsible for the management and operations of the Department of Energy's Savannah River Site, including the Savannah River National Laboratory, located near Aiken, South Carolina.
