**FOR IMMEDIATE RELEASE**

## Carol Johnson Named SRNS President & CEO

AIKEN, S.C. (May 20, 2014) – You may recognize the name of my successor, Carol Johnson, who recently joined Fluor Corporation. Carol has more than 30 years of leadership experience in the operation of high hazard nuclear facilities, environmental management, decommissioning and infrastructure at several DOE locations, including the Savannah River Site, where she served in numerous positions of increasing responsibility from 1994 to 2004.

Prior to joining SRNS, Carol served as president and project manager of the Washington Closure Hanford, LLC, where she led the \$2.4 billion environmental cleanup of the Hanford Site's 220-square-mile Columbia River Corridor, until she retired in 2013. She also served as the Executive Director of Infrastructure for the Sellafield Limited Sites in the United Kingdom and was responsible for all infrastructure services and systems for the site, enabling the operation of two major commercial fuel reprocessing plants. Additionally, she has held technical and managerial assignments at the Los Alamos National Laboratory and Idaho National Laboratory.

Carol is a graduate of Marshall University in Huntington, West Virginia, with a bachelor's degree in chemistry.

A proven leader with extensive industry experience, Carol's track record is exactly what is needed to take SRNS to the next level of performance.

Please give Carol a warm welcome.

With respect and gratitude, Dwayne Wilson

*Savannah River Nuclear Solutions is a Fluor-led company whose members are Fluor Federal Services, Newport News Nuclear and Honeywell, responsible for the management and operations of the Department of Energy's Savannah River Site, including the Savannah River National Laboratory, located near Aiken, South Carolina.*
