For Immediate Release

SRNS integrates WIN Assessments to boost opportunities for South Carolina job seekers

AIKEN, S.C. – (February 11, 2025) Savannah River Nuclear Solutions (SRNS) is pleased to announce the integration of WIN Learning (WIN) Academic Skills Assessments as part of the basic entry skills requirements for select non-exempt careers. This marks a significant milestone for SRNS, enhancing the company's partnerships with South Carolina school districts and ensuring jobseekers develop the foundational skills and competencies necessary for future careers at the Savannah River Site (SRS).

WIN Learning connects courseware and assessments to O*NET, a database of job attributes by the U.S. Department of Labor. Since 1996, WIN Academic Skills Assessments measure potential candidates' skills in three critical areas: Work Ready Math, Work Ready Reading, and Work Ready Data. These assessments will serve as an additional submission option for South Carolina residents, complementing the already established ACT WorkKeys assessments.

WIN Academic Skills Assessments validate foundational career skills in Math, Reading, and Data Analysis. Those who pass the courseware earn a digital e-badge and Certificate of Completion to share with employers.

"The inclusion of WIN Learning provides SRNS with an excellent opportunity to better identify potential candidates for employment," said Sean Alford, SRNS Executive Vice President and Chief Administration Officer. "Additionally, it offers high school students in South Carolina, who already take WIN assessments, an additional pathway. Graduates will be familiar with the scores required for employment and can identify areas for improvement. By aligning WIN with our employment opportunities, we create a mutually beneficial scenario for both job seekers and students."

Participants who pass the courseware earn a digital e-badge and Certificate of Completion to share with employers. All lessons support the U.S. Department of Labor Workforce Development Performance Measures and the U.S. Department of Education standards.

Kate Olin, Director of Accountability and Assessment, Aiken County Public School District, shared the school district's enthusiasm for the collaboration, stating, "This partnership with SRNS and the incorporation of the WIN Assessments demonstrate a strong commitment to preparing our students for the workforce. The alignment of the WIN assessment, in which all high school juniors in South Carolina participate, builds immediate connections to one of the largest employers in the Central Savannah River Area and provides students with a clear pathway to careers at SRS."

News from Savannah River Nuclear Solutions

SAVANNAH RIVER SITE • AIKEN • SC 29808

The adoption of WIN Assessments will impact the entry requirements for several key non-exempt seniority units, including Electrical and Instrumentation Mechanic, Maintenance Mechanic, Production Operator, and Radiological Protection Inspector. These assessment levels were determined by SRS subject matter experts and an authorized WIN Job Analyst.

For more information about WIN Learning and their e-learning solutions, including career readiness courseware, assessments, and credentials, please visit <https://www.winlearning.com/aboutwin> or contact HRPolicy@srs.gov.
